

Dejero

FirstNet™ Ready GateWay Devices

For Public Safety

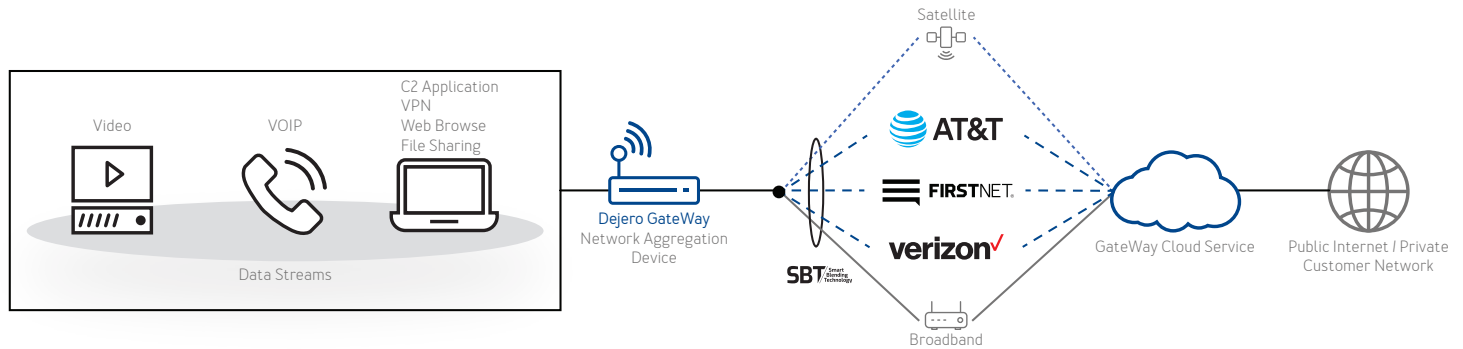

FirstNet Ready™ GateWay devices provide access to the nationwide public safety communications platform in the United States. Dejero's revolutionary *Smart Blending Technology* combined with the FirstNet priority network provides first responders unparalleled reliability and interoperability.

What it Does

Combining the power of the FirstNet network, commercial LTE, satellite, and broadband, Dejero GateWay network aggregation devices keep first responders connected when it matters the most.

With highly secure and prioritized network access, public safety agencies and first responders can quickly exchange mission-critical video and real-time data to help them make faster and better decisions.

What it Delivers

Enhanced Reliability

Dejero's revolutionary technology combined with the FirstNet priority network provides first responders unparalleled reliability and interoperability.

Uninterrupted Connectivity

Simultaneously combine multiple network connections for the greatest coverage possible that eliminates down time in congested and fringe coverage areas.

Simplified Solution

The Dejero GateWay solution includes FirstNet connectivity, offering a single, end-to-end solution for first responders and public safety agencies.

The FirstNet Ready™ network is the nationwide, wireless communications platform (powered by AT&T) dedicated to US first responders and the public safety community. The priority network helps law enforcement, firefighters, and EMS save lives and protect communities across the United States.
