## Intercom with Dante Virtual Soundcard

For Broadcast and Media

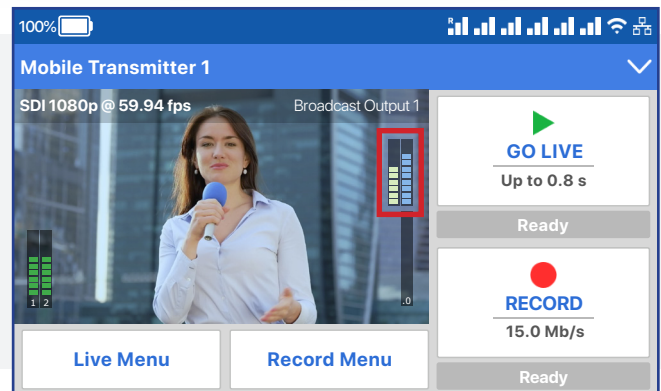

### What it Does

Dejero Intercom enables real-time two-way audio communication between a Dejero EnGo 260 mobile transmitter and a Dejero WayPoint 50 or 104 receiver in the station. The Dante Virtual Soundcard allows you to use audio over an IP connection.

### Using the Intercom feature with EnGo

- The Intercom feature is available when the EnGo 260 is ready to transmit live or when transmitting live.
- The Logitech H390 headset must be connected to the EnGo to use the feature. Audio is only transmitted when the headset is connected.
- With the headset connected, audio meters appear on the right side of the EnGo preview screen.

Intercom works independently of one-way IFB, offering the ability to have an IFB channel for talent and a two-way Intercom channel for the camera operator.

#### Supported Devices

|              |                           |
|--------------|---------------------------|
| Transmitters | EnGo 1.3, EnGo 260        |
| Receivers    | WayPoint 50, WayPoint 104 |
| Headsets     | Logitech H390 USB         |

#### Requirements

|          |   |
|----------|---|
| Software | Dante Virtual Soundcard license from Audinate (installed on WayPoint) |
|----------|---|

To set up the Intercom feature for the first time, contact Dejero Support ([support@dejero.com](mailto:support@dejero.com)) to install and configure the Audinate software on the WayPoint receiver
